

1. What is Django?

Answer: Django is a high-level Python web framework that encourages rapid development and clean, pragmatic design.

2. What are the key features of Django?

Answer: MTV architecture, ORM, admin interface, security features, scalability, and a large ecosystem.

3. Explain the MTV architecture.

Answer: MTV stands for Model-Template-View. Model handles database, Template manages UI, and View processes logic.

4. What is a Django model?

Answer: A model is a class that maps to a database table. It's defined in models.py.

5. What is a Django view?

Answer: A view is a function or class that takes a web request and returns a web response.

6. What is a Django template?

Answer: A Django template is an HTML file that contains placeholders for dynamic data rendering.

7. How do you create a Django project?

Answer: Use the command: `django-admin startproject projectname`

8. How do you create a Django app?

Answer: Use the command: `python manage.py startapp appname`

9. What is the purpose of manage.py?

Answer: It's a command-line utility that helps manage Django projects.

10. How do you run a Django development server?

Answer: Use the command: `python manage.py runserver`
